Introduction

Project review

This project is a comprehensive Salesforce application to streamline and manage various operational aspects of medical inventory. The system efficiently maintains supplier details, manages purchase orders, tracks product details and transaction and monitors the expired dates of products. It provides a comprehensive report and tracks supplier performance and purchased orders.

1.2 purpose

- 1. Ensures essential medicines and medical supplies are always available when needed.**
- 2. Prevents overstocking, shortages, and reduces wastage through expiry tracking.**
- 3. Automates ordering, stock monitoring, and reporting to save time and reduce errors.**
- 4. Maintains compliance with healthcare regulations and improves traceability.**
- 5. Supports better decision-making and improves overall patient care quality.**

Hi SANTHOSHKUMAR,

Thanks for signing up for a Developer Edition. Now you can start building on Salesforce for free and get hands-on with Agentforce and Data Cloud.

There's just one more step. Use the following link to reset the password for your Developer Edition. This link expires in 24 hours.

[Reset Password](#)

To easily log in later, save this URL:
<https://orgfarm-bb4dcaca6e-dev-ed.develop.my.salesforce.com>

Here's the username for your Developer Edition:
kumarsanthosh22831193@agentforce.com

Build enterprise-quality apps fast and get hands-on with Agentforce and Data Cloud.

Sign up for your Developer Edition.

- ✓ Build apps fast with drag-and-drop tools
- ✓ Go further with Apex code
- ✓ Build AI agents with Agentforce
- ✓ Harmonize your data with Data Cloud
- ✓ Ground Agentforce with structured and unstructured data
- ✓ Integrate with anything using APIs

Your org may be provisioned on or migrated to Hyperforce, Salesforce's public cloud Infrastructure.

I agree to the Main Services Agreement – Developer Services and Salesforce Program Agreement. I acknowledge, as described in the Developer Documentation: (1) the Developer Edition includes autonomous and other generative AI features; and (2) Salesforce may limit use of those features and the org, and may terminate any org that has been inactive for 45 days.

•Creating a tab for Product,Purchase Order, Order Item, Inventory Transaction, Supplier in custom object tab

The screenshot shows the Salesforce Setup interface with the 'Tabs' page selected. The left sidebar includes 'Setup', 'Home', 'Object Manager', and a search bar. Under 'User Interface', 'Tabs' is selected. A message at the bottom left says, "Didn't find what you're looking for? Try using Global Search." The main content area is titled 'Custom Tabs' and contains sections for 'Custom Object Tabs', 'Web Tabs', 'Visualforce Tabs', and 'Lightning Component Tabs'. The 'Custom Object Tabs' section lists tabs for 'Inventory Transactions' (Building style), 'Order Items' (Books style), 'Products' (Airplane style), 'Purchase Orders' (Bank style), and 'Suppliers' (Can style). Each row has 'Edit | Del' links and a 'New' button.

Action	Label	Tab Style	Description

•Creating a Product Name, Product Description, Current Stock Level, Unit Price Field in Product Object

The screenshot shows the Salesforce Setup interface for the Product object. The left sidebar includes links for Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Search Layouts, and List View Button Layout. The main content area displays the 'Fields & Relationships' section with 8 items, sorted by Field Label. The table columns are FIELD LABEL, FIELD NAME, DATA TYPE, CONTROLLING FIELD, and INDEXED.

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Created By	CreatedById	Lookup(User)		
Current Stock Level	Current_Stock_Level_c	Number(18, 0)		
Last Modified By	LastModifiedById	Lookup(User)		
Owner	OwnerId	Lookup(User,Group)		✓
Product Description	Product_Description_c	Text Area(255)		
Product ID	Name	Text(80)		✓
Product Name	Product_Name_c	Text(255)		
Unit Price	Unit_Price_c	Currency(16, 2)		

•Creating a Supplier ID, Order Date, Order Count, Field in Purchase Order Object

The screenshot shows the Salesforce Setup interface for the Purchase Order object. The left sidebar includes links for Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Search Layouts, and List View Button Layout. The main content area displays the 'Fields & Relationships' section with 11 items, sorted by Field Label. The table columns are FIELD LABEL, FIELD NAME, DATA TYPE, CONTROLLING FIELD, and INDEXED.

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Actual Delivery Date	Actual_Delivery_Date_c	Date		
Authorization Form Text	Authorization_Form_Text_c	Master-Detail(Authorization Form Text)		✓
Created By	CreatedById	Lookup(User)

• Creating a Phone Number, Email Field in Supplier object

The screenshot shows the Salesforce Setup interface for the 'Supplier' object. On the left, a sidebar lists various setup categories like Details, Fields & Relationships, Page Layouts, and Lightning Record Pages. The main area is titled 'Fields & Relationships' and displays a table of existing fields:

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Created By	CreatedById	Lookup(User)		
Email	Email__c	Email		
Last Modified By	LastModifiedById	Lookup(User)		
Owner	OwnerId	Lookup(User,Group)		✓
Phone Number	Phone_Number__c	Phone		
Supplier ID	Name	Text(80)		✓

• To edit a Page Layout in Product Object

The screenshot shows the Salesforce Setup interface for the 'Product' object. The sidebar includes options like Details, Fields & Relationships, and Page Layouts. The main area shows the 'Page Layouts' configuration screen. At the top, there are buttons for Save, Quick Save, Preview As..., Cancel, Undo, Redo, and Layout Properties. The layout editor shows sections for Fields, Information, System Information, and Custom Links. A preview pane at the bottom shows the layout structure with fields like Product Name, Unit Price, and Last Modified By.

• Create a Purchase Manager Role .

The screenshot shows the Salesforce Setup interface under the Roles section. The search bar at the top contains 'rol'. The main content area displays the 'Purchasing Manager' role details. The 'Role Detail' section includes fields for Label ('Purchasing Manager'), Modified By ('SANTHOSHKUMAR.S'), and Opportunity Access ('Users in this role can edit all opportunities associated with accounts that they own, regardless of who owns the opportunities'). The 'Users in Purchasing Manager Role' section lists one user: 'purchaseM John' (alias 'jouc', username 'mlorette@blue7190.com', active status checked). A note at the bottom left says 'Didn't find what you're looking for? Try using Global Search.'

• Create an Inventory Manager Role.

The screenshot shows the Salesforce Setup interface under the Roles section. The search bar at the top contains 'rol'. The main content area displays the 'Inventory Manager' role details. The 'Role Detail' section includes fields for Label ('Inventory Manager'), Modified By ('SANTHOSHKUMAR.S'), and Opportunity Access ('Users in this role can edit all opportunities associated with accounts that they own, regardless of who owns the opportunities'). The 'Users in Inventory Manager Role' section lists one user: 'ram krishna' (alias 'kris', username 'tkim@yellow7777.com', active status checked). A note at the bottom left says 'Didn't find what you're looking for? Try using Global Search.'

• Create a Purchase Manager Create Access To Permission Set.

The screenshot shows the Salesforce Setup interface. In the top left, there's a search bar with 'Search Setup'. The top navigation bar includes 'Setup', 'Home', 'Object Manager', and various icons for configuration. On the left, a sidebar has a search bar ('Q perm') and sections for 'Users' (with 'Permission Set Groups' and 'Permission Sets' selected), 'Custom Code', and 'Custom Permissions'. A message at the bottom says ' Didn't find what you're looking for? Try using Global Search.' The main content area is titled 'Permission Sets' and shows a 'Purchase Manager Create Access' permission set. It has fields for 'Description' (empty), 'License' (empty), 'Session Activation Required' (unchecked), 'Permission Set Groups Added To' (0), 'API Name' (Purchase_Manager_Create_Access), 'Namespace Prefix' (empty), 'Created By' (SANTHOSHKUMAR_S, 9/5/2025, 6:00 AM), and 'Last Modified By' (SANTHOSHKUMAR_S, 9/5/2025, 6:04 AM). Below this is a section titled 'Apps' with a list of assigned apps: Assigned Apps, Assigned Connected Apps, Object Settings, App Permissions, Apex Class Access, Visualforce Page Access, External Data Source Access, and Flow Access.

• Create a Flow Actual Delivery Date Updating.

The screenshot shows the Salesforce Flow Builder interface. The top navigation bar includes 'Flow Builder', 'Actual Delivery Date Updating - V1', and various buttons like 'Select Elements', 'Run', 'Debug', 'View Tests', 'Save As New Version', 'Save', and 'Deactivate'. The main area displays a flow diagram for a 'Record-Triggered Flow' starting with 'Purchase Order' object and 'A record is created or updated' trigger. The flow consists of the following steps: 'Get Purchase Record' (Get Records), 'Assignment' (Assignment), 'Updating Purchasing Order' (Update Records), and 'End'. There are '+' buttons between each step to add more actions. At the bottom left are flow navigation buttons: back, forward, and search.

• Apex Trigger Create an Apex Trigger

The screenshot shows the Salesforce IDE interface. The top navigation bar includes File, Edit, Debug, Test, Workspace, Help, and a Go To button. Below the navigation bar, the code editor window is open with the file name 'CalculateTotalAmountTrigger.apxt'. The code is a trigger for the 'Order_Item__c' object:

```
trigger CalculateTotalAmountTrigger on Order_Item__c (after insert, after update, after delete, after undelete) {
    // Call the handler class to handle the logic
    CalculateTotalAmountHandler.calculateTotal(Trigger.new, Trigger.old, Trigger.isInsert, Trigger.isUpdate, Trigger.isDelete, Trigger.isUndelete);
}
```

The code editor has tabs for Logs, Tests, Checkpoints, Query Editor, View State, Progress, and Problems. The Logs tab is selected. Below the tabs is a table with columns for User, Application, Operation, Time, Status, Read, and Size. At the bottom of the code editor is a filter bar with a 'Filter' checkbox and a 'Click here to filter the log list' input field.

• Create an Apex Handler class.

The screenshot shows the Salesforce IDE interface. The top navigation bar includes File, Edit, Debug, Test, Workspace, Help, and a Go To button. Below the navigation bar, the code editor window is open with the file name 'CalculateTotalAmountHandler.apxc'. The code defines a class 'CalculateTotalAmountHandler' with a static method 'calculateTotal':

```
public class CalculateTotalAmountHandler {
    public static void calculateTotal(List<Order_Item__c> newItems, List<Order_Item__c> oldItems, Boolean isInsert, Boolean isUpdate, Boolean isDelete, Boolean isUndelete) {
        // Method to calculate the total amount for Purchase Orders based on related Order Items
        Set<Id> parentIds = new Set<Id>();
        // Collect Purchase Order IDs affected by changes in Order_Item__c records
        if (isInsert || isUpdate || isDelete || isUndelete) {
            for (Order_Item__c item : newItems) {
                parentIds.add(item.getPurchaseOrder__c);
            }
            for (Order_Item__c item : oldItems) {
                parentIds.add(item.getPurchaseOrder__c);
            }
        }
        Map<Id, Purchase_Order__c> purchaseOrders = new Map<Id, Purchase_Order__c>([
            for (Order_Item__c item : newItems)
                item.getPurchaseOrder__c
            for (Order_Item__c item : oldItems)
                item.getPurchaseOrder__c
        ]);
        for (Id parentId : parentIds) {
            Purchase_Order__c purchaseOrder = purchaseOrders.get(parentId);
            if (purchaseOrder != null) {
                purchaseOrder.setTotalAmount(calculateTotalAmount(purchaseOrder));
            }
        }
    }
}
```

The code editor has tabs for Logs, Tests, Checkpoints, Query Editor, View State, Progress, and Problems. The Logs tab is selected. Below the tabs is a table with columns for User, Application, Operation, Time, Status, Read, and Size. At the bottom of the code editor is a filter bar with a 'Filter' checkbox and a 'Click here to filter the log list' input field.

•Create a Medical Inventory DashBoard to Medical Inventory Management App in Dashboard Tab.

This screenshot shows the Microsoft Power BI interface for creating a dashboard. The top navigation bar includes links for Purchase Orders, Order Items, Inventory Transactions, Suppliers, Products, Reports, and Dashboards. A search bar at the top right allows for searching recent dashboards. The main area is titled "Medical Inventory ...". On the left, there's a sidebar with categories: Dashboards (Recent, 1 item), Folders (Created by Me, Private Dashboards, All Dashboards), and Favorites (Created by Me, Shared with Me). The main content area displays a table for "DASHBOARDS" with one row for "Recent". The row details are: Dashboard Name - Medical Inventory DashBoard, Description - , Folder - Private Dashboards, Created By - SANTHOSH KUMAR S, Created On - 9/5/2025, 7:50 AM, and Subscribed - . At the bottom right of the main area, there's a message: "Activate Windows Go to Settings to activate Windows.".

Final output

This screenshot shows the final "Medical Inventory DashBoard" as of Sep 5, 2025, 7:55 AM, viewed by SANTHOSH KUMAR S. The dashboard has two main cards. The first card, "Purchase Orders based on Suppliers", features a gauge chart with a scale from 0 to 100. The second card, "Complete Purchase Details Report", also features a similar gauge chart. Both cards have "View Report" buttons and a timestamp of "As of Sep 6, 2025, 2:58 AM". The top navigation bar and search bar are identical to the previous screenshot.

Advantages

1. Improved Efficiency

Automates tracking, reduces manual work.

Streamlines ordering and stock management.

2. Cost Control

Minimizes waste and overstocking.

Prevents loss from expired or unused items.

3. Accurate Inventory Tracking

Real-time updates on stock levels.

Tracks expiry dates, batch numbers, and usage.

4. Regulatory Compliance

Supports compliance with healthcare standards (e.g., FDA, HIPAA).

Provides audit-ready documentation.

5. Better Patient Care

Ensures essential supplies are available when needed.

Reduces delays in treatment or procedures.

6. Informed Decision-Making

Offers data analytics for demand forecasting.

Supports better budgeting and procurement planning.

Disadvantages

1. High Initial Costs

Requires investment in software, hardware, and setup.

Ongoing maintenance can be expensive.

2. Training Needs

Staff must be trained to use the system effectively.

Poor training can lead to errors and inefficiencies.

3. Technical Issues

System downtime can disrupt supply access.

May delay urgent medical services.

4. Complexity in Integration

Difficult to integrate with other hospital systems (EHR, billing).

Customization can be time-consuming.

5. Cybersecurity Risks

Sensitive inventory and patient data must be protected.

Requires robust data protection and compliance.
